Phase II Environmental Site Assessment

Project No. G2290-62-02
July 18, 2018

Lennar
16465 Via Esprillo, Suite 150
San Diego, California 92127

Attention: Mr. David Shepherd

Subject: PHASE II ENVIRONMENTAL SITE ASSESSMENT REPORT
CARLTON OAKS COUNTRY CLUB
SANTEE, CALIFORNIA

Dear Mr. Shepherd:

In accordance with your request, we have performed a Phase II Environmental Site Assessment (ESA) on approximately 103.8 acres (seven parcels) of the Carlton Oaks Country Club located at 9200 Inwood Drive (the Site) in Santee, California (see Figure 1). The accompanying report presents the details of our Phase II ESA.

A review of historical documents, which was performed as part of our forthcoming Phase I ESA, indicated that the Site has been operating as a golf course since approximately 1964. Organochlorine pesticides (OCPs) and arsenic (commonly used in pesticides) may have been applied to the Site. Given the planned residential redevelopment of the Site, a Phase II ESA was recommended to assess the Site for OCPs and arsenic.

SITE ASSESSMENT ACTIVITIES

The scope of the Phase II ESA consisted of the following:

- Soil sample collection.
- Analytical testing of soil samples for OCPs and arsenic.
- Preparing this report presenting our findings including laboratory analytical results.

Soil Sample Collection

On July 5, 2018, 108 discrete soil samples (SS-1 through SS-108) were collected from a depth of approximately 6 inches at the locations shown on Figure 2. The samples were collected using a decontaminated trowel and then transferred into 4-once laboratory-provided jars. The jars were capped

with Teflon-lined lids and placed in a chilled cooler for transport to the laboratory under chain-of-custody protocol.

Analytical Testing

Advanced Technology Laboratories (ATL), a State-certified laboratory located in Signal Hill, California, combined four discrete soil samples from similar locations to form 27 four-part composite soil samples for OCP analysis (USEPA Test Method 8081A). Additionally, a portion of the 27 discrete soil samples was retained for arsenic analysis (USEPA Method 6010B).

RESULTS

Table 1 summarizes the laboratory analysis results for the soil samples. A copy of the laboratory analytical report is attached.

OCPs

The following OCPs were detected in the composite soil samples:

- Chlordane was detected in one of the 27 composite soil samples analyzed at a concentration of 9.5 micrograms per kilogram ($\mu\text{g}/\text{kg}$), which is less than the Department of Toxic Substance Control's (DTSC's) Human and Ecological Risk Office (Hero) Note 3 modified Screening Level (SL) updated January 2018, for residential soil of 440 $\mu\text{g}/\text{kg}$.
- Dieldrin was detected in one of the composite soil samples at a concentration of 2.8 $\mu\text{g}/\text{kg}$, which is less than the EPA Regional Screening Level (RSL) updated May 2018, for residential soil of 34 $\mu\text{g}/\text{kg}$.
- DDE was detected in two of the composite soil samples at concentrations of 3.3 and 9.7 $\mu\text{g}/\text{kg}$, which are less than the current RSL for residential soil of 2,000 $\mu\text{g}/\text{kg}$.
- DDT was detected in one of the composite soil samples at a concentration of 2.3 $\mu\text{g}/\text{kg}$, which is less than the current RSL for residential soil of 1,900 $\mu\text{g}/\text{kg}$.
- Heptachlor epoxide was detected in one of the composite soil samples at a concentration of 1.4 $\mu\text{g}/\text{kg}$, which is less than the current RSL for residential soil of 70 $\mu\text{g}/\text{kg}$.
- Gamma-Chlordane was detected in one of the composite soil samples at a concentration of 1.1 $\mu\text{g}/\text{kg}$ and delta-BHC was detected in three of the composite soil samples at concentrations ranging from 1.1 to 22 $\mu\text{g}/\text{kg}$. Gamma-Chlordane and delta-BHC are breakdown compounds and neither the HERO Note 3 SLs nor the RSLs have established screening levels for gamma-Chlordane or delta-BHC.

No other OCPs were detected at concentrations exceeding the laboratory practical quantitation limits (PQLs) in the 27 composite soil samples. Additionally, the analysis method PQLs were less than the RSLs and the HERO Note 3 SLs for residential soil if established.

Arsenic

Arsenic was detected in 17 of the 27 discrete soil samples analyzed at concentrations ranging from 1.0 to 8.4 milligrams per kilogram (mg/kg). Arsenic is a natural mineralogical component of soil and its naturally occurring or “background” concentrations in California soils typically range from 0.6 to 12 mg/kg and much higher in some areas depending on the mineralogy of the soil’s parent material. Therefore, regulatory agencies allow comparison of arsenic concentrations in soil to naturally occurring background arsenic concentrations instead of calculated screening levels. The reported arsenic concentrations found in the samples are within the range of naturally occurring (background) arsenic concentrations for soil.

CONCLUSION AND RECOMMENDATIONS

OCPs were not detected in any of the composite soil samples collected from the Site at concentrations exceeding applicable residential screening levels and the reported arsenic concentrations are within the range of naturally occurring (background) arsenic concentrations for soil in southern California.

These findings suggest that workers and future site residents will not be exposed to OCPs or arsenic at concentrations that will be a potential threat to human health. Therefore, no further investigation of the nature and extent of OCPs or arsenic in soil at the Site is warranted.

LIMITATIONS

The conclusions presented in this report are based upon limited soil sampling and analysis within the scope and budget of the contract. The information presented is relevant to the dates of our site investigation and should not be relied upon to represent conditions at later dates. The opinions expressed herein are based on our experience with similar studies and information obtained during our effort. If additional information becomes available, we request the opportunity to review the information and modify our opinions, if necessary. Any reliance upon the information, conclusions, or recommendations contained in this report shall be at the sole risk of the party undertaking such use.

Our services have been conducted using the degree of care and skill ordinarily exercised, under similar circumstances, by environmental sciences consultants practicing in this or similar localities. No other warranty, express or implied, is made as to the professional opinions presented in this report. Geocon is not responsible for the conclusions, opinions, or recommendations made by others based on this information.

This report was compiled based partially on information supplied to Geocon from outside sources, other information that is in the public domain and visual observations made at the property. The conclusions and recommendations herein are based solely on the information Geocon obtained in compiling the report. Geocon makes no warranty as to the accuracy of statements made by others which may be

contained in the report, nor are any other warranties or guarantees, express or implied, included or intended by the report except that it has been prepared in accordance with the current generally accepted practices and standards consistent with the level of care and skill exercised under similar circumstances by other professional consultants or firms performing the same or similar services. None of the work performed hereunder shall constitute or be represented as a legal opinion of any kind or nature, but shall be a representation of findings of fact from records examined.

We appreciate the opportunity to have performed this Phase II ESA. Please contact the undersigned with any comments or questions.

Very truly yours,

GEOCON INCORPORATED

Re: ATL Work Order Number : 1802449
Client Reference : Carlton Oaks, G2290-62-02

Enclosed are the results for sample(s) received on July 06, 2018 by Advanced Technology Laboratories. The sample(s) are tested for the parameters as indicated on the enclosed chain of custody in accordance with applicable laboratory certifications. The laboratory results contained in this report specifically pertains to the sample(s) submitted.

Thank you for the opportunity to serve the needs of your company. If you have any questions, please feel free to contact me or your Project Manager.

Sincerely,

A handwritten signature in black ink, appearing to read "Eddie Rodriguez".

Eddie Rodriguez
Laboratory Director

San Diego , CA 92121

Project Number : Carlton Oaks, G2290-62-02
Report To : Brett Conner
Reported : 07/16/2018

Notes and Definitions

R3	RPD value outside acceptance criteria. Calculation is based on raw values. The analytical batch was validated by the Laboratory Control Sample (LCS).
M2	Matrix spike recovery outside of acceptance limit due to possible matrix interference. The analytical batch was validated by the laboratory control sample.
ND	Analyte is not detected at or above the Practical Quantitation Limit (PQL). When client requests quantitation against MDL, analyte is not detected at or above the Method Detection Limit (MDL)
PQL	Practical Quantitation Limit
MDL	Method Detection Limit
NR	Not Reported
RPD	Relative Percent Difference
CA2	CA-ELAP (CDPH)
OR1	OR-NELAP (OSPHL)

Notes:

- (1) The reported MDL and PQL are based on prep ratio variation and analytical dilution.
- (2) The suffix [2C] of specific analytes signifies that the reported result is taken from the instrument's second column.
- (3) Results are wet unless otherwise specified.

1. Sample receiving hours: 7:30 AM to 7:30 PM Monday - Friday; Saturday 8:00 AM to 12:00 PM.
2. Samples Submitted AFTER 5:00 PM are considered received the following Business day at 8:00 AM.
3. The following time and cost conditions apply:
 - TAT = 1: 100% Surcharge SAME BUSINESS DAY if received by 9:00 AM
 - TAT = 2: 50% Surcharge 2ND BUSINESS DAY (COB 5:00 PM)
 - TAT = 3: 30% Surcharge 3RD BUSINESS DAY (COB 5:00 PM)
 - TAT = 4: 20% Surcharge 4TH BUSINESS DAY (COB 5:00 PM)
 - TAT = 5: NO SURCHARGE 5th BUSINESS DAY (COB 5:00 PM)
4. Weekend, holiday, after-hours work - ask for quote.
5. Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab - ask for quote.
6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air samples will be disposed of after 14 calendar days after receipt of samples.

7. Electronic records maintained for five (5) years from report date.
8. Hard copy reports will be disposed of after 45 calendar days from report date.
9. Storage and Report Fees:
 - Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage or hold is requested.
 - Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/ sample/week if extended storage is requested.
 - Hard copy and regenerated reports/EDDS: \$17.50 per hard copy report requested; \$50.00 per regenerated/reformulated report; \$35 per reprocessed EDD.
 - Rush TCLP/STLC samples: add 2 days to analysis TAT for extraction on procedure.
 - Unanalyzed samples will incur a disposal fee of \$7 per sample.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.

2. Samples Submitted AFTER 3:00 PM, are considered received the following Business day at 8:00 AM.

3. The following turnaround time code will apply:

TAT = 0 : 300% Surcharge SAME BUSINESS DAY if received by 9:00 AM

TAT = 1 : 100% Surcharge NEXT BUSINESS DAY (COB 5:00 PM)

TAT = 2 : 50% Surcharge 2ND BUSINESS DAY (COB 5:00 PM)

TAT = 3 : 25% Surcharge 3RD BUSINESS DAY (COB 5:00 PM)

TAT = 4 : 20% Surcharge 4TH BUSINESS DAY (COB 5:00 PM)

TAT = 5 : NO SURCHARGE 5th BUSINESS DAY (COB 5:00 PM)

4. Weekend, holiday, after-hours work - ask for quote.

5. Subcontract TAT is 10 - 15 business days. Projects requiring shorter TATs will incur a surcharge respective to the subcontract lab - ask for quote.

6. Liquid and solid samples will be disposed of after 45 calendar days from receipt of samples; air

samples will be disposed of after 14 calendar days after receipt of samples.

7. Electronic records maintained for five (5) years from report date.

8. Hard copy reports will be disposed of after 45 calendar days from report date.

9. Storage and Report Fees:

- Liquid & solid samples: Complimentary storage for forty-five (45) calendar days from receipt of samples; \$2/sample/month if extended storage or hold is requested.

- Air samples: Complimentary storage for ten (10) calendar days from receipt of samples; \$20/sample/week if extended storage is requested.

- Hard copy and regenerated reports/EDDS: \$17.50 per hard copy report requested; \$50.00 per regenerated/reformatted report; \$35 per reprinted EDD.

10. Rush TCLP/STLC samples: add 2 days to analysis TAT for extraction on procedure.

11. Unanalyzed samples will incur a disposal fee of \$7 per sample.

As the authorized agent of the company above, I hereby purchase laboratory services from ATL as shown above and hereby guarantee payment as quoted.
